Wilton, NH 03086
May 31, 2006

Zoning Board of Appeals
Wilton Town Offices
Main Street
Wilton, NH 03086

Dear Board Members:

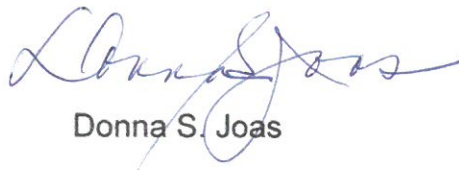

Regarding the graveling variance requested by Zahn/Kennedy on Isaac Frye Highway, please register my objection to the granting of any such variance, either on Isaac Frye or anywhere else outside of the Wilton graveling district, as approved by the voters last March.

The so-called hardships suggested by the petitioners are totally without substance. The subject lot is already suitable for residential building as evidenced by the house that already exists there. Wilton is characterized by rolling hills so to say you can't build on less than flat land is just not true.

Further, the zoning ordinance concerning graveling was passed by the voters in order to preserve the character and beauty of Wilton. To allow the petitioners to reduce the buffers and set-backs on this already too narrow lot will create an eye sore that will take generations to recover. The clear cutting of the trees in March 2006 has already created a visual disaster area.

Please reject this variance application.

Thank you,

Donna S. Joas
