Dear Members of the town of Wilton, NH Planning Board:

My husband, Michael Boggs, and I live at 192 Wilson Rd which directly abuts lot F-3-2 owned by Isaac Frye Holdings LLC. We are writing to reiterate that we still object to the excavation performed on the aforementioned site (which we have opposed since it was discovered in late 2020) for all the reasons previously submitted to the ZBA both directly and via the counsel of Silas Little. We ask that all these submissions, both from us, other abutters and Attorney Little be made a part of the case before the Planning Board.

In addition, it should be noted that on the "Existing Conditions Plan" and the "Grading Drainage and Erosion Control Plan" for lot F-3-2 drawn by Rokeh Consulting, LLC a treeline approximately 20' or more from our property line is shown. Although this area was once completely wooded before the excavation, there is now absolutely no tree cover up to our property line; this denoted area of trees is incorrect. The excavation was done without any buffer whatsoever: trees and debris have pushed over onto our lot, fences have been installed right over the edges of our land. Note attached photos.

Thank you very much for your time.

Sincerely, Shannon Linn & Michael Boggs
